

Cross Platform iOS/Android with Visual Studio and C# - Part 2

Leverage your skills in Microsoft Visual Studio and C# to build cross-platform apps that run on both Android and iOS, and embrace the features and capabilities of each platform.

Authored by: [Jim Wilson](#)

Duration: 3h 51m

Level: Intermediate

Released: 3/11/2014

Course Rating: ★★★★★

Progress

Duration

	Course Goals and Requirements	00:07:10
	Introduction	01:28
	Swipe-based Paging	00:43
	Multi-screen Navigation	00:51
	Embrace Platform Capabilities and Common Behaviors	01:04
	What You Need for This Course	02:11
	Summary	00:50
	Swipe-Navigation in Android	00:44:29
	Introduction	01:20
	Direct Navigation	01:10
	Moving to Swipe-Navigation	02:53
	Add Random Access to Course Library	05:13
	Create the Course Fragment	09:02
	Support Package and Namespace	03:25
	Add Support Library as a Xamarin Component	03:17
	Implement FragmentStatePagerAdapter	06:26
	Create the New Activity Layout	02:11
	Create the Swipe-Navigation Activity	05:11
	Demo: Using Swipe-Navigation	01:20
	Summary	01:21
	Getting a Deeper Understanding	01:33
	Swipe-Navigation in iOS	00:33:26
	Introduction	01:08
	Moving from Direct to Swipe Navigation	02:25
	Adding the UIPageViewController	05:23
	Creating the per Course UIViewController	02:32
	Displaying the first Course Page	04:52
	Demo: Displaying the first Course Page	00:50
	Adding Navigation Events	03:18
	Adding Position Awareness to Course UIViewController	02:50
	Handling Navigation Events	04:20
	Demo: Using Swipe Navigation	00:47
	Adding page Turning effects	03:41

Summary	01:13
 Working with iOS Protocols	00:28:09
Introduction	00:57
What are Protocols	01:14
Xamarin Sometimes Hides Protocol Use	02:55
Swipe Navigation with Delegates vs. Protocol	05:13
The Challenge of Protocols in C#	01:02
Why are we Talking About this Now?	01:08
Implementing Protocols in Xamarin	02:49
Implication of Protocols as Classes	03:04
Implementing Course Swipe Navigation w/ Protocol	08:37
Summary	01:04
 Android Master/Detail Navigation	00:37:49
Introduction	01:07
Android Master/Detail Experience	01:57
Creating a Master List Activity	02:38
Working with an ArrayAdapter	03:31
Why an ArrayAdapter isn't our Best Choice	01:01
Creating a Custom List Adapter	04:43
Implementing List Adapter GetView	07:32
Connecting the Custom List Adapter	02:03
Starting the Detail Activity	04:03
Passing Intent Extras	07:40
Summary	01:30
 Android Navigation Drawer	00:38:02
Introduction	01:17
Overview of the Android Navigation Drawer	01:33
Activity Architecture with Navigation Drawer	02:47
Adding Navigation Drawer to the Layout	05:49
Managing Master and Detail Data Together	02:13
Populating the Navigation Drawer Choices	03:43
Customizing the Navigation Drawer List Appearance	05:15
Managing List Selections in the Navigation Drawer	02:56
Making the FragmentStatePagerAdapter Updatable	06:02
Updating the Displayed Details	03:50
Summary	02:30
 iOS Master/Detail Navigation	00:42:53
Introduction	01:39
iOS Master/Detail Experience	01:52
iOS Master/Detail Architecture	02:35
iOS UI Options	03:04
Creating a Master Table View Controller	02:56
Creating a Table View Data Source	07:49
Connecting Table View and Data Source	02:23

Adding a Navigation Controller	02:14
Displaying the Detail View Controller	04:48
Passing the Master Selection to the Detail View Controller	03:03
Fixing Project Version Issues	02:54
Adjust Detail View Controller Layout	02:39
Summary	02:04
Where to Go from Here	02:45
